

This year, Compute Ontario and ORION partner to bring you a joint conference which combines Compute Ontario Research Day 2016 (CORD2016) and the ORIONTHINK Conference, into one day at

diTHINK.

May 26, 2016 Chestnut Residence, 89 Chestnut Street, Toronto, ON

About diTHINK.

Digital infrastructure. It's empowering the Digital Individual, giving them Digital Independence, enabling Democratic Innovation. DIYers can set up their own collaboration systems, undertake advanced computing analysis of crowd-sourced data, and create monitoring devices tailored to their community's needs. Tech goes selfie for an inclusive future. Find out how this is affecting research, education and innovation.

Featured speakers:

- Ted Graham: How "The Uber of Everything" will disrupt what you're working on right now
- Mark Daley, Compute Ontario Chair and Western University AVPR: The future of advanced computing in enabling research

Call for Submissions

Submit your abstracts for contributed and poster presentations by April 29th!

- Professors, postdoctoral, graduate, and undergraduate students: Present your Advanced Computing/HPC-related research and learn from others' during the diTHINK diComputing track (CORD2016)
- Prizes for best posters in several categories
- Parallel tracks of contributed presentations

Important dates:

- April 29:** Poster and Abstract submissions
- May 9:** Notification of acceptance
- May 10:** Deadline for discounted registration
- May 26:** diTHINK conference, breakfast and lunch provided

Registration and submissions:
